During Term 2, Years 3 & 4 students have been working hard at creating an edition of prints in their printmaking unit.

They began by investigating and sketching creepy crawlies and the environment that they live in before deciding on a final design for their prints.

Next, they transferred their design onto a foam printing plate.

Each student then began using printing inks and equipment to create their edition of at least 3 prints. Many students enjoyed the process so much that they wanted to do more!

Their fantastic designs will be seen lining our hallways very soon.
